SKILLS

Risk management	ISO 27001 27002 27005	CIS18 NIST 800-53	ISMS
Compliance report writing	Compliance gap analysis	Contingency plans	Threat analysis
Risk appetite/tolerance	Mitigation plans	Risk matrix	SoA

EXPERIENCE

The LEGO Group Student worker

Jan 2024 - 2026

- Assessed compliance with CIS18 Control 5 (IAM) and conducted an ISO 27005 risk assessment using STRIDE and attack trees as the threat analysis (bachelor's thesis).
- Facilitated cross-functional meetings where teams presented ongoing projects to each other.
- Wrote and distributed a newsletter that highlighted the team's deliverables within the department.
- Developed a technical solution that reduced debugging time when teams' Kubernetes clusters unintentionally changed their egress IP.

Tech Chapter (a small DevSecOps consultancy) Student worker

Jun 2025 - Dec 2025

- Performed gap analysis against CIS18 and NIST 800 53, prepared implementation plans and presented them to, and advised, the executive management through precise reports and presentations, which increased compliance with a strategic key customer's control requirements.
- Implemented outstanding NIST 800 53 controls through: automated access review, an emergency break-glass script, and a phishing-campaign tool, and presented them to the executive management, which increased compliance with the aforementioned requirements.

EDUCATION

BA. IT-security Copenhagen Business Academy GPA: 11,8

Aug 2022 - Jan 2026

- Worked with CIS18, ISO 27005, 27001 and 27002 (2017 and 2022/23): ISMS, SoA, asset classification, risk matrix, heat map, risk appetite/tolerance, risk treatment and monitoring, threat analysis, and contingency and business continuity plans for critical systems.
- ISO 27001 and 27002 were used in particular in real-world-like cases, presentations, exam projects, and the bachelor's project.
- Worked with GDPR, ISO 27701 and 27018.
- Governance course focusing on short, precise reports for management.
- Course in incident response and contingency; broad knowledge in IT security (network analysis, cryptography and secure software development).
- Active in student jobs and voluntary associations — coffee bar, events committee, tutor and mentor.

PERSONAL PROFILE

My goal is to mature an organization's processes within IT security management. I am social, a team player, and very structured and thorough in the way I work. I am particularly strong in my written communication. I read many books, especially technical literature, and use my local library a lot. I have had various volunteer jobs and have just applied to be a volunteer homework tutor for disadvantaged children.
